the First Time-Something About the Uses of Farce Comedy-The "New Woman"-Interesting News and Comment.

Somewhere in one of his essays on art. Mr. Hamilin Garland finds vast profit to the American stage from the temporary supremacy of farce comedy. But for the liberal license granted by the public nd accepted by the farceurs, he thinks, we would still be weeping over the mawk-Scial adventures of the Elizibsh melodrama. He finds in the burlesque comedian the chief destroyer of the artificial in stage art. To him, he says, we owe the present ble horoes and starcy villains, and the ten-

Perhaps Mr. Garland is right. We all know the potency of the burlesquer whethwe take any stock in Ingersoll or not There is probably not a man living, and rather be abused than ridiculed. If, then farce comedy has created a din and raised dust only to clear the atmosphere of much that was glaringly false or stupidly traditional, the results have justified the methods, especially when the means em-

methods, especially when the means employed are of necessity ephemeral.

Whatever how been the cause, the public has certainly outgrown its tasts for many old and unnatural forms. What is true of the drama is more apparent in literature, and somewhat munifest in art. Whether primary factors in the evolution or not, certainly the burlesquer, the satirist and the cartonies, who have contributed so much to the entertainment of the people of these times, have wielded a powerful influence.

There will always be some extreme tenden that as time goes on there will be exacted a higher standard of purity in the frivolous entertainments of the stage. Some one might apily take the question whether we might not befor weep at false sentiment than laugh at voltar lokes. Perhaps some time hissing shall become permissible and commendable in the American theater. If it does, the coarse conseilan will base his does, the coarse comedian will have his

For one, I should like to see the satirist turn his aftention to the "new woman." Not the new woman as she actually ex-ists—for she is all right except in rare in-stances, where the momentum of sudden progress throws her a little out of line— but the new woman of the dramatists. Dumas, the younger, began by showing us several blemished heroines weeping their lives away because of the inexorable laws of society which forbede their standing on the same moral—or shall I say immoral—platform with men, and Dumas was supposed to have platform with men, and Dumas was sup-posed to have gone pretty far even for France, and he was considered at the time of his advent wholly until for the ingen-uousness of the American audience. But it remained for the English dramatists to 80 pervert some laudable ambitions of the modern woman in political and social affairs into the most unwomanly of all de-mands. Piners, instead mands. Pinero insisted on sympathy for the conscienceless Mrs. Tanqueray, Grun-dy took tenable ground when he made his heroine the helpless result instead of the willing medium of illett love. But Henry Arthur Jones, who started with a mind pure enough to conceive "Sairts and Con-

cense, but looking for one for herself.
There are other dramatists, more or less skillful, trying to get snap shots of some eccentricity of the cult without seriously considering the cult itself.
Since redeate is more powerful than argument, let the satirists and burlesquers turn their weapons on these creatures whom the dramatists are exploiting in the disculse of the new woman.

Mr. Owen Ferree, the advance representative of Jacob Litt, was in a reminison most the other day. Contrary to expectations this season has been a harder one than last in the theatreal business. The promise of better times led to a good many ill advised theatrical adventures, and it is estimated that more companies left New York last fail than ever before, although some of them were late in starting out. A New York paper says that 10 per cent of these organizations have come in, and that there are now no less than 3,000 ineraployed a tors and astresses in the metropoli. Aside from the fact that spending money is not plentiful, it is generally conceded among actors and managers alike that the profession is overcrowded, as a result of the stage a lot of people elever enough to do a good turn, but with little or no general adaptability to the exactions of the profession. Now that farce comedy has waned, there is no place for them. Again, it is said incidentally—whereas, it should be said primarily—that there are too many theaters. But for the overhulding of playhouses there could not have been a many traveling companies, and consequent fewer people who should be tong emerically in the country that has not too many theaters. Further that has not too many theaters. Further that he overhulding of playhouses there exists no describe the would have been attacked to the footlights. There is scarce in the too many theaters. play, "Guy Demville," met on Saturday night last at St. James' theater. In much that has been written on the subject, those who should be best informed seem to agree that the heastlithy referred to was something in the nature of an organized cabal against Mr. James. It is noted as curious fact that there were signs of disapproval at the end of the first and second acts, but the storm broke out at the end of the play, which is in three acts, and the persistence with which the pit and gallery insisted that the author should appear, and the way in which they insuited him when he did reluctantly appear before the curtain certainly pointed to something beyond dislike of the play itself. The hooting, groaning, hissing and insults which greeted Mr. James when he was led before the footlights by Mr. Alexander was most bitter, and it seems impossible to believe that they were not the outcome of some prearranged plot.

It is some years since Mr. James contributed anything to English dramatic art and his absence from the hondon boards has been a matter for regret, as he has always been regarded as a dramatist of fine intellectual attainments.

Dr. Hartman Writes on Chronic Catarrh, Coughs, Colds, La Grippe and Con-sumption, as Follows:

Chronic catarrh is the bane of American civilization. There is no organ of the human body that it cannot destroy, nor disease it does not imitate. Catarrh prevails in all seasons and spares no calling or vocation. No locality is entirely free from its ravages; no amount of vitality can withstand its attack. Neither childhood nor old age is exempt from its presence, and it does not respect sex, color, or nationality. Summer and whiter, spring and autumn, chronic catarrh ceases not to sillict a large per cent of the inhabitants of this country. But it is especially dur-

Sir Walter Scott's Dogs

Sir Walter Scott was a great lover of dogs, and always had fine ones around him. One day, in conversation with a friend, he said: "Those dogs," to two fine hounds lying on the hearth. understand every word I say." friend expressed his doubts of this statement. Sir Walter, to prove it, took up a book and began thus to read aloud: "I have two lazy, good-for-nothing dogs, who lie by the fire asleep and let cattle ruin my garden." Both dogs instantly sprang up and ran out of the room, and, finding no cattle in the gar-den, returned and lay down by the fire. The baronet again read from the book the story. Again the dogs ran out and again returned disappointed and lay down. The third time their master told the story, when instead of going out the dogs came up to him and looked him in the face, whined and wagged their tails, as much as to say: "You have made game of us twice, you cannot do it for the third time."
